Summary

I am working as a backend developer at Gainrow agency and I am the CTO of the company. I have created a store application using the MVC model with PHP and created a landing pages website for practice HTML, CSS, and JS and right now I am building an eCommerce website using pure PHP8, OOP, MVC Model, MySql (MariaDB), Agile Kanban. I am also an instructor of web development teaching coding for beginners in my country.

Skills

HTML/CSS • JavaScript • Php mysql • Python • Fortran • Pascal • Kanban • Linux

Work Experience

CTO   Aug 2020 – present

Gaingorw • Full-time

Bechar, Algeria

Technologies: HTML • CSS3 • JavaScript • PHP • MySQL

I am working as a backend developer at **Gainrow** agency and I am the CTO of the company. I am responsible for programming projects, whether it is a mobile application or a website.

web developer   Jul 2021 – Sep 2021 • 2 mos

khamsat • Freelance

Remote

Technologies: PHP • JavaScript • Mvc • MySQL • HTML/CSS

Khamast is an Arabic freelance website like Upwork and Freelancers. I started work on projects to fix script errors and check security issues of the website and complete or add some new features to the website based on client requests.

Projects

Store projects   Aug 2020 – Sep 2020 • 1 mo

Technologies: PHP • MySQL • Mvc • Oop

I start using all my knowledge to build a store application with PHP MVC OOP my goal is to understand the concept of MVC and OOP, how to create a autoload function, namespaces, and some concepts like Dependency injection. I see that a lot of people after learning OOP they run to use Laravel or other frameworks without good understand or practice OOP concepts like design pattern, solid principle, and MVC structure in how to make router, ORM, and how to use controllers models and views and make them connect together to apply separation of concerns (SoC) design principle concepts to create an amazing application.

eCommerce website   Dec 2021 – present

Technologies: PHP • Mvc • MySQL • Oop

I'm still working on this project to create a full eCommerce website.

Portfolio website   Jul 2021 – Jul 2021 •

Technologies: HTML/CSS • JavaScript

Just a simple static website to remember and practice some new features in css3 like flex, grid, and other properties. I like to stay updated it always

Educations

Bachelor's degree: Mechanical engineering   Dec 2016 – Aug 2021 • 4 yrs 8 mos

Tahri mohammed university

Bechar, Algeria

I study Mechanical engineering but I don't like it so much because I love to write code every day and develop my software, solve some problems or challenges, and contribute to open source projects but the things that made me happy to go study is the programming class when we started study computer basic like system binaries, Algorithms, Pascal, Fortran and how to create a program that makes the machine give us the right products that we want. The second thing is that I meet with an amazing professor teach me who to solve programming problems, write clean code and I learned more about other concepts that I did not know from my self-education.

Certifications & Awards

Effective communication skills from best life project - Cambridge Academy 4R&S Uk N 003203   Oct 2016
